

# CONSTRUCTION NOTICE

## BROOKFIELD-NORTH RIVERSIDE WATER COMMISSION FILLMORE STREET WATER MAIN PROJECT

(FROM HANNAH TO HARLEM)  
Please see map on reverse

The Village of Forest Park has executed an agreement with the Brookfield-North Riverside Water Commission (BNRWC) to allow a potable water pipe to be installed under Fillmore Street from Hannah Avenue to Harlem Avenue this summer of 2017. The Village of Forest Park is not using any funds to pay for this work. The project is solely funded by the BNRWC.

Work shall consist of installing a 36" diameter water main along Fillmore. The entire roadway will be reconstructed as part of this work, including new curb and gutter and removal and resetting of the original bricks. The parkway will be restored up to the sidewalk and ADA compliant sidewalks will be installed at each intersection.

The project is proposed to start the week of April 24, 2017, ***WEATHER PERMITTING***, and be completely restored to the original condition on or before July 15, 2017.

Residents fronting Fillmore will receive additional construction notices identifying: any substantial changes to the start date of work and driveway service interruption.

During the construction period, there will be no parking along Fillmore Street. Alley access will be maintained; however, we encourage residents to avoid Fillmore Street when possible.

Should you have any questions regarding this project, please feel free to call Public Works Director John Doss at 708-615-6212 or email [publicworks@forestpark.net](mailto:publicworks@forestpark.net).

Your patience during this construction period is greatly appreciated.

John Doss  
Public Works Director
